Construction project on schedule on US 2 southwest of Williston

The North Dakota Department of Transportation (NDDOT) announced today that the construction project on US Highway 2 southwest of Williston, from 128th St. NW to 141st Street is on schedule. Construction project work consists of concrete overlay work at the intersections of 138th Street, 139th Street and the junction of US 2 and US 85 to enhance the roadway system for the increased traffic needs.

During construction:

- Traffic is reduced to one-lane in each direction in a head to head fashion in the eastbound lanes for approximately 10 days and then all traffic will be switched to the westbound lanes in a similar fashion for approximately 10 days.
- Temporary signals are in place and flaggers may be present
- A 12-foot width restriction is in place
- Speeds may be reduced
- Motorists may experience delays.

A number of projects are still taking place in the Williston area, NDDOT appreciates motorists' patience, once the projects are completed; there will be an enhanced road system, built to handle the growing transportation needs in this area. Truck drivers are encouraged to utilize the temporary truck bypass northwest of Williston.

The NDDOT asks motorists to plan ahead, allow for additional traveling time, consider alternative routes and drive safely.

For more information about construction projects and road conditions throughout North Dakota, visit the Travel Information Map on the NDDOT website at <http://www.dot.nd.gov/travel-info-v2/>.
